

Product Owner

Cruden develops simulators that enable F1 teams to build faster cars and coastguards to be ready to save people from the next big storm. Our simulators are key tools in development of the cars of the future and research for safe and comfortable autonomous transport.

We are looking for a motivated Product Owner to join our team. The successful candidate will be responsible for the entire Panthera Software Suite, which caters both the Marine and the Vehicle simulation markets.

You will be a member of the Development Team, who, like you, are among the best in their field. This Team has people with a mix of competences, such as coders, testers and artists. You will be the link between the developers and the product management. Together you'll be developing Cruden's next generation of Vehicle and Fast Craft Simulators. The ideal candidate will be motivated, flexible, pragmatic and have a Can Do mentality.

You'll actively look for input for the development roadmap from all stakeholders. Product Managers for the Marine and Vehicle markets will discuss their visions with you and you'll also find requirements regarding technical debt from the Development and Operational Teams. You'll bring all these requirements together and make a careful, educated decision on our priorities for the next iteration of the Panthera Software Suite.

The knowledge about what's next to be developed should be forged into epics, features and userstories in our development management system, Azure DevOps. This way, your team members can start developing the next iteration of our products. You're actively monitoring development progress and discuss alternative solutions with stakeholders when you see an opportunity. You're hosting the sprint demos and signing off features to verify that developments fulfill the customer needs. Above all, you are the main person to talk to within Cruden when it comes to the Panthera Software Suite.

About you:

- You have a university degree in software engineering or equivalent;
- You have experience as a Product Owner of a suite of applications;
- You have experience with the development of complex software systems that include interfaces with local hardware;
- You are comfortable with modern-day software development tools, especially Azure DevOps;
- You're fluent in English (and preferably also in Dutch).

About us - we'll offer you:

- A representative salary, 25 holidays (at 40 working hours per week) and a pension plan;
- A highly competent and energetic team that can't wait for you to join them;
- The possibility to make an impact in co-creating Cruden's Panthera Software Suite;
- An open-minded, small company with a family feel and a flexible attitude.

Do you live in the Netherlands and can you commute to Amsterdam on a daily basis? Do you have what it takes to develop products used by the most demanding people in the business, such as F1 drivers and navy seals? Then we'd love to hear from you!

Please send your application to jobs@cruden.com.

We don't appreciate acquisition in regards to this vacancy.
