

Junior Project Manager

Cruden develops professional open architecture driving simulators for the automotive, motorsport and marine industries. We supply flexible, durable, high performing real-time simulators and their modular components: hardware, software, vehicle models, content and projection systems.

We are looking for a motivated project manager to join our team. The role will be responsible for leading and managing simulator installations and ongoing technical matters for customers in the professional motorsports, R&D, attractions and training markets. The junior project manager will be able to focus on achieving deadlines and assure solutions are realized to the highest standard, on time and within budget.

The junior project manager will be responsible from the beginning of the project until the post-installation handover and commissioning at the customer's site. This is not a largely desk-based job; the position involves active project implementation. There is a requirement to control and manage a portfolio of multiple projects simultaneously and a duty to report on progress to the operations manager.

The ideal candidate will be motivated, flexible and extremely pragmatic. The role will not suit those with a preference for a "9 to 5" job. The candidate must be willing to travel globally and work autonomously as well as in a team. Good communication skills are essential, especially as the junior project manager is the key interface between the company and our diverse customer base.

Responsibilities & duties

- Manage projects from beginning to end;
- Define detailed project scope, goals and deliverables based on the commercial information;
- Be an integral part of the project team;
- Estimate the resources needed to achieve project goals;
- Effectively communicate project expectations to team members;
- Plan and schedule project timelines and milestones using Cruden administrative tools.
- Track project milestones and deliverables plus resources spent.

Required education and experience

- B.Sc. in mechanical / electrical engineering (or equivalent);
- Confident with PCs and networks;
- Commercial understanding is an advantage;
- Ability to conform to shifting priorities, demands and timelines;
- Reactive to project adjustments and alterations promptly and efficiently;
- Dutch speaking;
- Good knowledge of English;
- Valid driving license.

Please send your application (including motivation and resume) to jobs@cruden.com.
We don't appreciate acquisition in regards to this vacancy.
